**Colouring Book**

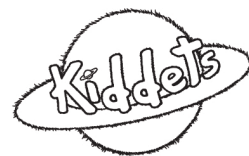

The Kiddets are space cadets, explorers-in-training at a space academy on planet WotWot. They learn through play in their stunning playroom that overlooks an exotic space port floating in the blue sky above their planet.

The Kiddets – Stripes, Patches, Bounce, Luna and Dapper are, under the watchful eye of SpottyWot and DottyWot learning everything they need to know to become a team of explorers who will one day set off to investigate other planets. Our five Kiddets each have an area of special interest such as leadership, health and safety, mechanics, science and the arts.

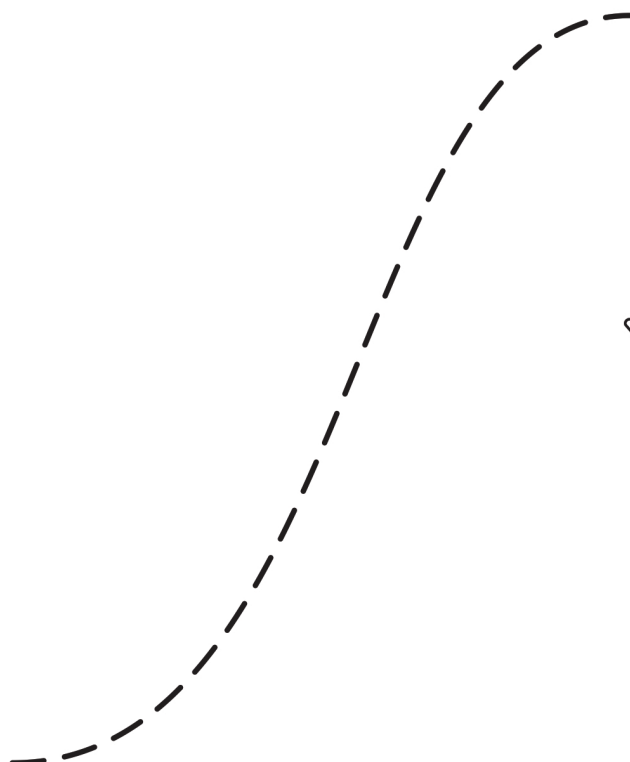

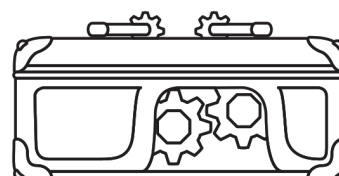

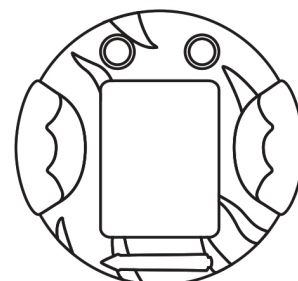

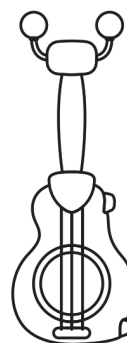

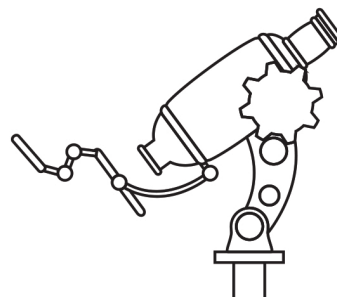

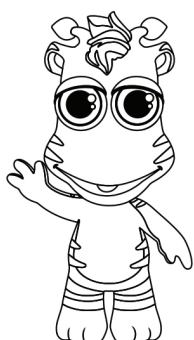

Kiddets celebrates the joy of discovery, learning through play and demonstrates the positive values that are the building blocks of a true and enduring friendship.

# Match the Kiddet to their belongings!

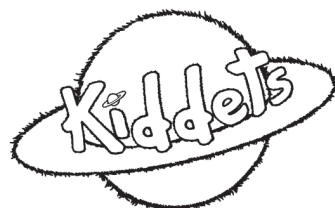

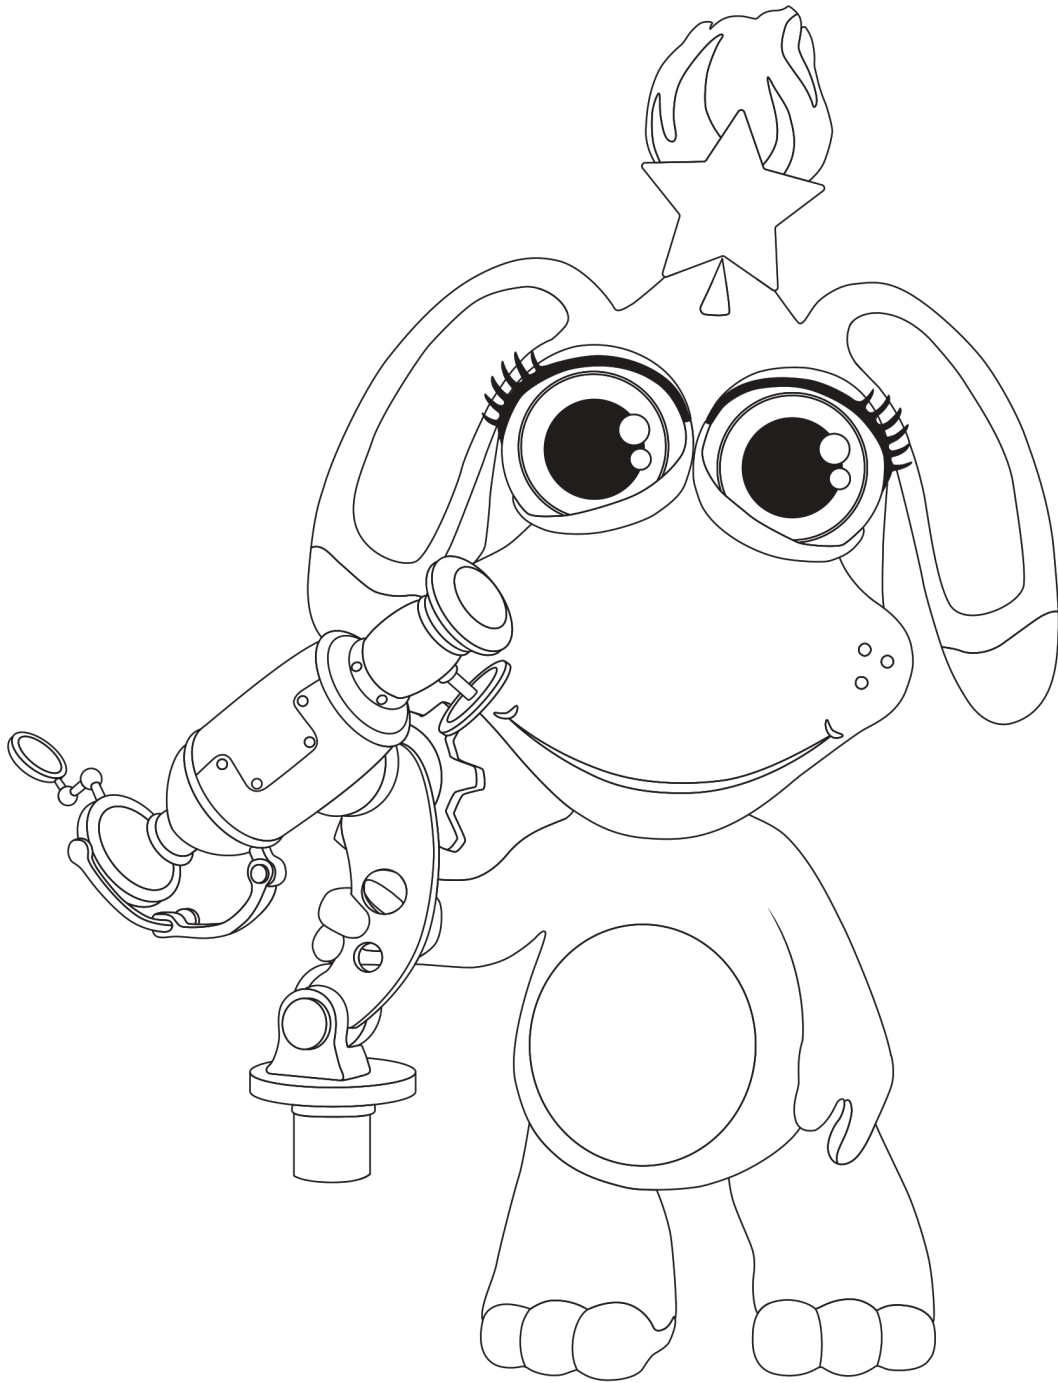

The Kiddets' have made a big mess! Can you draw line to match the objects to the correct Kiddet and work station?

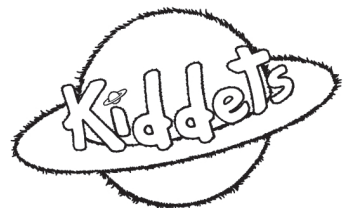

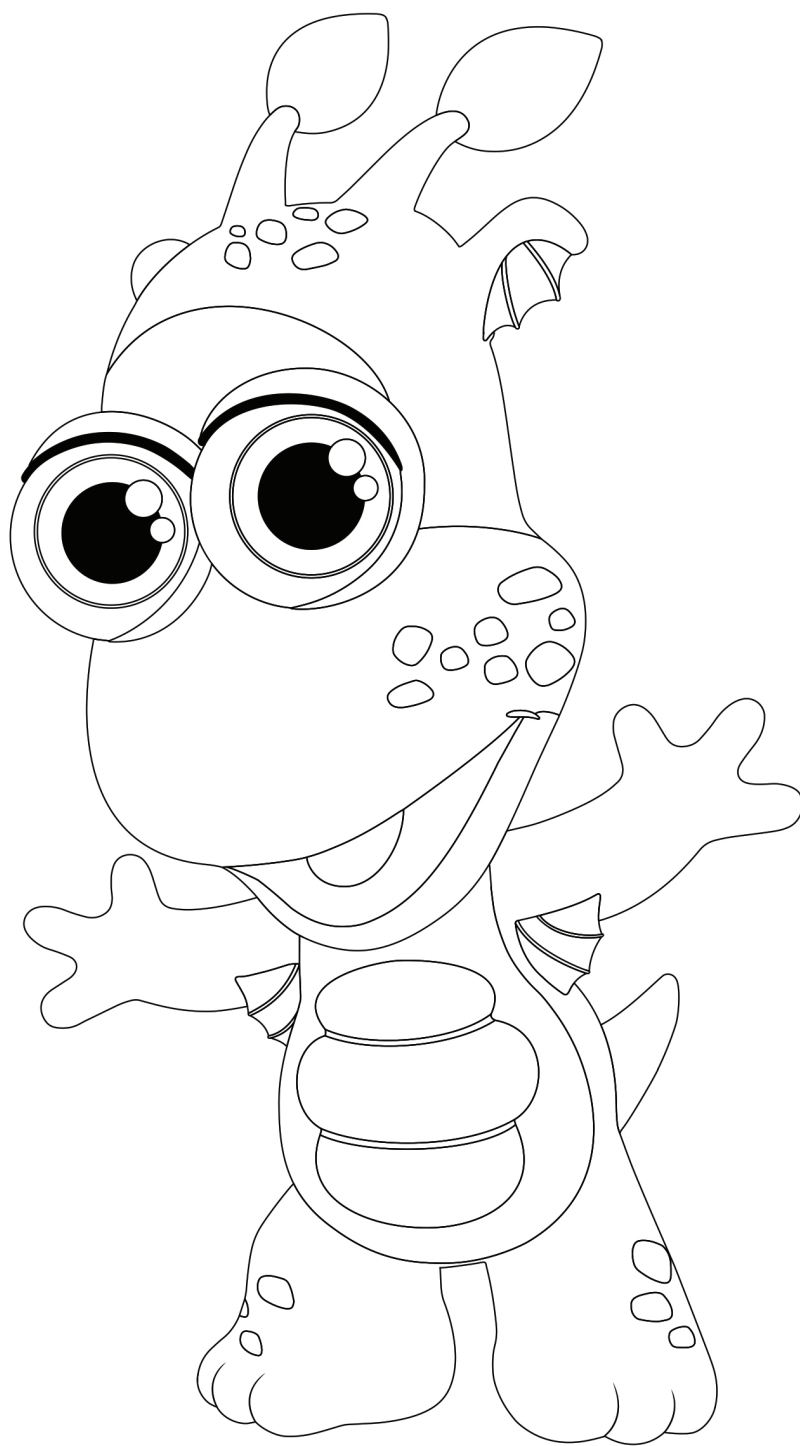

Stripes

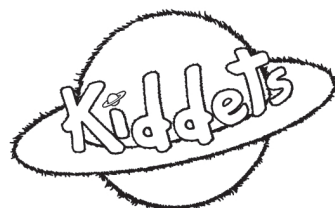

Luna

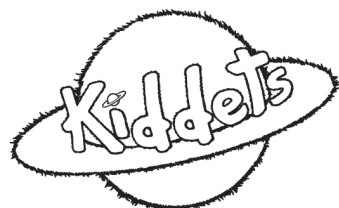

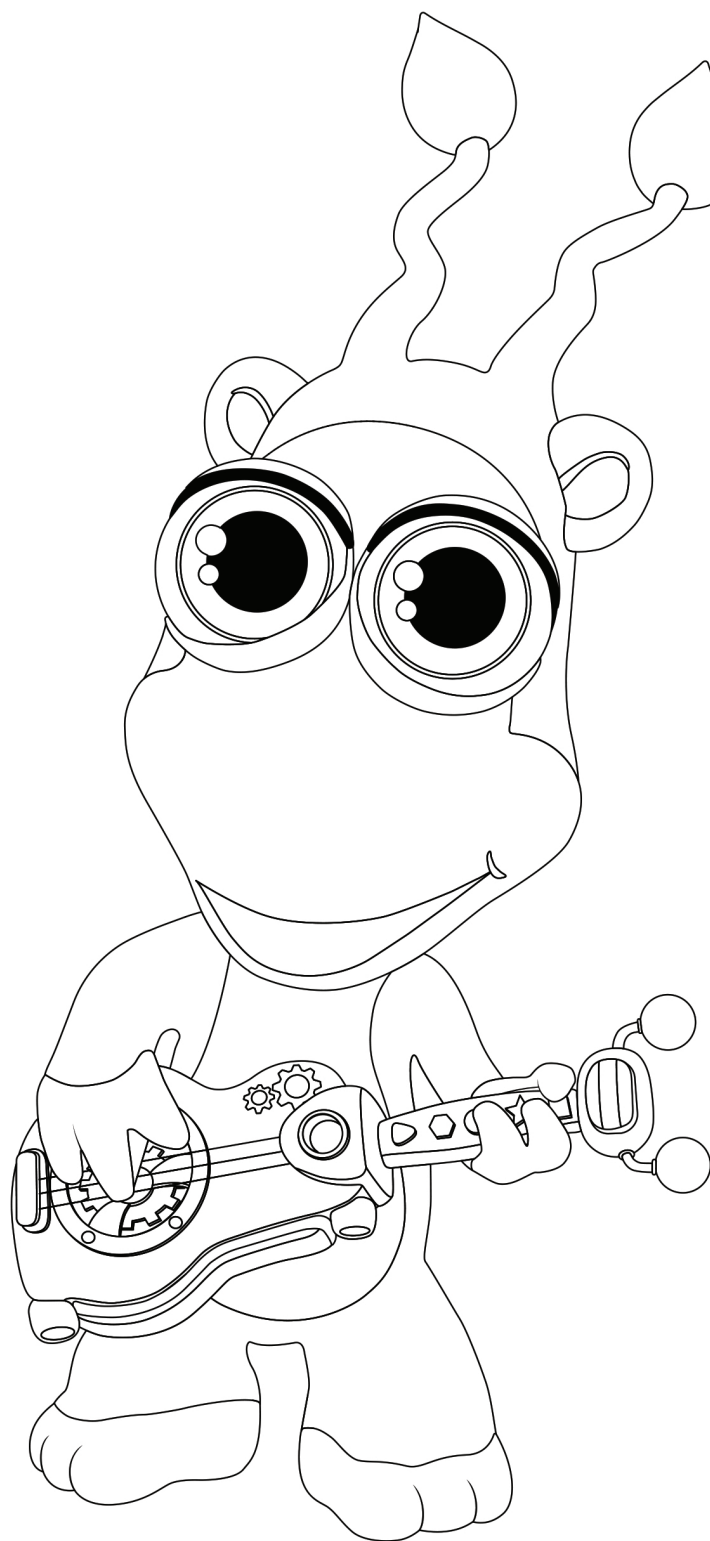

**Bounce**

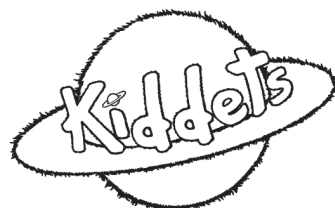

Patches

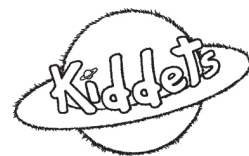

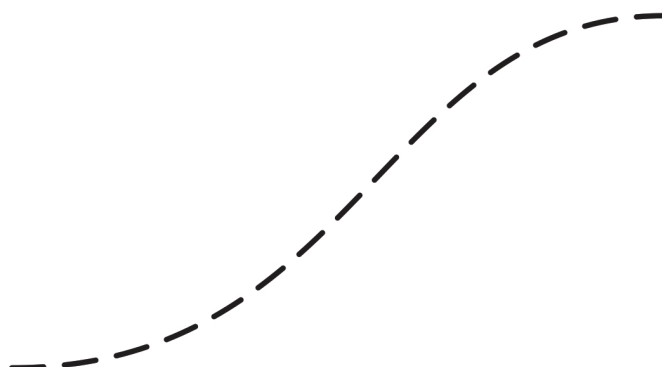

**Dapper**

# Match the Kiddet to their Shadow!

No need to be scared Patches! It is only your shadow!  
Draw a line to match each of the Kiddets to their shadow.

Stripes is training to be a team leader. One day he hopes to be the captain of their spaceship.

He is always ready with encouragement and support for his friends, and is diligent and enthusiastic about trying to understand what it means to make decisions, to listen to others and to be inclusive. He is thoughtful, intelligent and kind, always looking for solutions to the Kiddets problems.

Stripe's hope is to be a pilot one day, he LOVES learning to fly and spends hours practising his piloting and navigational skills on his simulator and hover chair.

Patches LOVES to move. Whether it's kicking a ball, dancing, exploring the garden or playing a game, Patches is energetic, enthusiastic and is always the first to say yes!

She is studying health through nutrition and fitness, and has taken on the responsibility of keeping everyone safe and the play space tidy. It's a role she really enjoys and so she is always researching new foods, exercises and games to play.

And don't let her sweet appearance fool you, she is very competitive, especially with soccer, a game that she plays, practices and watches whenever she can.

Bounce cannot contain his excitement about learning... literally. When Bounce discovers a new machine, invention or tool he will start bouncing with delight.

Bounce lives to construct and create. He is a team player and always says it like it is. He loves anything mechanical. He wants to know how it works, moves and functions. He wants to take it apart and then put it back together again! And for this reason, when the Kiddets need something invented or envisioned – Bounce is their man.

His joy of life and willingness to throw himself at any challenge is very infectious and all his friends LOVE him to bits.

Dapper is a budding artist and the youngest member of the Kiddets. He has a quick wit combined with youthful enthusiasm, naivety and sense of fun. He LOVES anything big, bright and noisy.

Dapper is driven by creativity and loves exploring his world through art, music and theatre. It is often Dapper who finds creative and quirky solutions to a problem, using art in the most surprising ways.

Dapper is ready for any adventure as long as he has friends by his side... because sometimes adventures can be a little scary.

Luna LOVES space. She loves its scale, mystery and possibilities. Luna applies this enthusiasm to everything she does, especially when it involves science and new discoveries!

Luna thinks a little more deeply than the others and so is slower to leap into action, but she has a deep sense of empathy and is always ready with support and advice for her friends.

She loves playing and studying in a group, but she's also happy in her own world of discovery at her workstation with her telescope and on the rooftop garden, tending her beloved plants.
